

10 REASONS TO USE STUDYMATE CAMPUS IN K-12

1

Much More Than Flashcards

Don't settle for flashcard websites! StudyMate Campus lets teachers and students create games and self-assessments that support a range of learning styles. Students learn the same content whether they choose Flash Cards, Pick A Letter, Fill in the Blank, or another learning activity. StudyMate Campus also support multiple-choice formats, transforming test questions into practice quizzes and games.

2

Seamless Integration with Learning Systems

StudyMate Campus works seamlessly with learning systems like Canvas, Schoology, Moodle, Blackboard Learn, and Brightspace. There are no external websites and no registration steps for teachers or students. StudyMate looks like a native tool in the learning system, allowing everything to occur within the online class itself.

3

No Advertisements

StudyMate Campus doesn't contain advertisements, in-app purchases or upsells of any kind. The world is distracting enough, right?

4

One Template, Many Activities

Three simple templates are used to create content, from which 11 learning activities and games are generated. There are no limits to the number of projects, questions, or images that can be used.

5

For Teachers and Students

Both teachers and students can create and share StudyMate activities. Those created by teachers allow statistics to be viewed on student use. Those created by students can be shared with classmates – all within the safe confines of the learning system. StudyMate Campus is ideal for any discipline, but is particularly effective in classes where students learn a lot of terminology, facts and core concepts.

6

Team-Teaching Features

StudyMate Campus has powerful team-teaching features. One teacher can create and manage a StudyMate project (or an entire folder of projects) while other teachers "follow" the project. Each teacher can see use stats for their own classes and edits can be made from a central location.

7

Save Time by Reusing Content

Existing content is easily brought into StudyMate Campus, so you never have to start from scratch. Entire sets of questions and glossary terms can be imported into StudyMate. Or, copy items directly from StudyMate projects created by others. Everything can be organized in folders, and even shared that way.

8

Mobile Learning

StudyMate Campus lets students learn from anywhere, anytime. Free mobile apps for iOS and Android give students quick access to study materials – even if they're offline.

9

Easy Training and Rollout

Rollout of StudyMate Campus is easy! Video tutorials and resources are available within the application itself – keeping teachers and students in the learning system.

10

Bundled with LockDown Browser

A StudyMate Campus license covers students, teachers, administrators and helicopter parents – all for one low price. It's also contained in a 2-for-1 bundle with LockDown Browser for K-12 schools. LockDown Browser is the "gold standard" for locking down a computer or device during an online exam – over 1,500 institutions rely on it to deter cheating on 80 million exams annually.
